AST → HTML!?

- Then Javascript

```
- for (var x = 0; x < 3; x++)
  li item

-

  var list = ["Uno", "Dos", "Tres",
              "Cuatro", "Cinco", "Seis"]
each item in list
  li= item
```

AST → Javascript
Solution

- Function constructor

- let fn = new Function(arg1, arg2, functionBody)

```javascript
const func = Function(Object.keys(variables), functionString)
const result = func(Object.values(variables ?? {}))
```
